Only one Show covers every degree of climate control...

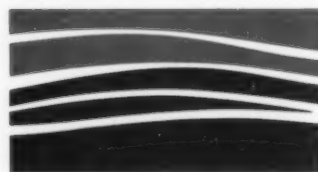

In just three days, you can:

- Find cost-effective solutions to your toughest HVAC&R industrial, commercial, residential and institutional problems.
- Examine thousands of the latest products, systems and services from over 800 leading manufacturers and suppliers.
- View demonstrations of equipment and machinery in action.
- Compare price, quality and equipment compatibility on-the-spot.
- Discuss your specific requirements with hundreds of technical experts.
- Make the most informed buying decisions for your company.

Don't miss the #1 HVAC&R event of the year!

GOO THERMAL

ENERGY SYSTEMS

21ST CENTURY HEATING & COOLING IS HERE TODAY!
Now your customers can capitalize on the earth's natural ability to store and conserve energy with the **FHP CLOSED LOOP HEAT PUMP SYSTEM.**

COST SAVINGS

The efficient alternative to fossil fuels. Proven 50-70% reduction in heating bills and up to 40% less cooling costs compared to conventional air conditioning systems. Plus, the FHP Super Series offers the Highest Efficiency in the Industry.

SAFE FOR THE ENVIRONMENT

The system recirculates air with a limited quantity of antifreeze to maintain year-round comfort. No discharges. No pollution. Just a few square feet are normally required for the vertical heat exchanger.

NEAR-ZERO MAINTENANCE

The simplicity of the FHP Closed Loop System employs a piping network with a minimum lifespan of over 50 years. And, with less equipment and fewer moving parts, those aggravating callbacks are nearly non-existent.

HORIZONTAL, VERTICAL, SPLIT UNITS AND COUNTERFLOW TO MEET ALL YOUR NEEDS

Floating Head System Increases Capacity

This patented system allows you to float head pressure without any subcooling or special valves. Increases efficiency for virtually any freon reciprocating air conditioning or refrigeration system.

Call or FAX us today for more information.

Unique! Simple!

The Best Technical Solution for Ultra Low Refrigeration Systems.

The Mycom industrial refrigeration compound series are available in twelve models for 290 to 3340 CFM low stage displacements.

Each compound screw has two stages of compression within one structure with capacity modulation on each stage, requiring single oil management system and single drive.

Mycom Refrigeration Equipment, the blueprint for success.
